

class_traintest.OneHotEncoding.sample
_imbalance

class_traintest.OneHotEncoding.split
_xtrain_ytrain

class_traintest.OneHotEncoding.create
_xy_frames

```
graph LR; A[class_traintest.OneHotEncoding.sample_imbalance] --> C[class_traintest.OneHotEncoding.create_xy_frames]; B[class_traintest.OneHotEncoding.split_xtrain_ytrain] --> C;
```

The diagram illustrates a dependency or flow. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'class_traintest.OneHotEncoding.sample_imbalance' and the bottom box contains 'class_traintest.OneHotEncoding.split_xtrain_ytrain'. On the right, there is a single gray rectangular box with a black border containing the text 'class_traintest.OneHotEncoding.create_xy_frames'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both functions on the left are inputs or dependencies for the function on the right.
